

Grand Lakes Municipal Utility District No. 2

EVO 10-Year Financial Operating Strategy - FY 2025

What's in your **BASELINE:**

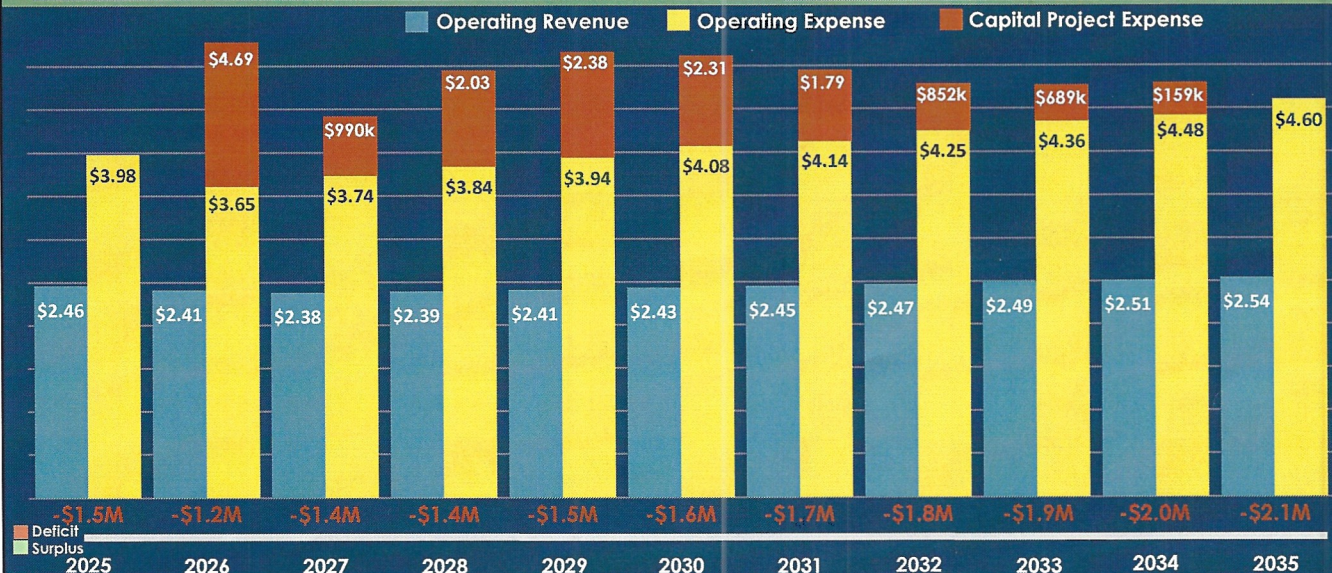

- Maintains a steady M&O tax rate of \$0.128
- Assumes a 3% annual increase in taxable value
- Assumes a 99% collection rate for M&O tax revenues
- Assumes a 4.0% average annual increase in garbage expenses and wastewater revenue, based on the 10-year average of historical CPI increases
- Assumes a 3.5% annual increase in other operating expenses
- Includes all Capital Improvement projects after an unsuccessful Bond Authorization election in May 2026

With no other adjustments, reserves fall to -68.55 months.

Sources used in this study:

- Revenue and expense data are based on the latest audit
- Beginning cash balance is derived from the latest audit and includes cash, money market, and certificate of deposit funds
- Taxable value & Tax rate are from the latest Tax Report from your Tax Assessor
- All Capital Projects are from your Capital Improvement Plan provided by your Engineer

High Level
Observations
Baseline

Immediate Action Required

In the recent election, voters did not authorize the bond funding that would have allowed the District to finance these improvements over a 20-30 year period. Because the need for these projects remains, the District must now fund them through operating revenue rather than long-term financing. Additionally, the District must take steps to restore service rates to make up the revenue short-fall introduced by the reduction of Sales Tax revenue. Over the last 6 years the District's supplementation of Water & Sewer, Garbage & Security revenue has resulted in an average of \$7,857 of savings per District household. This does not include savings introduced by an extremely reduced tax rate.

Recommendations:

- Immediate implementation of new Rate Order to restore balance of Revenues & Expenses in the General Operating Fund
- Elimination of non-essential expenses including reclaimed water irrigation, streetlighting and security. These expenses are traditionally covered by resident's HOA fees but were taken on by the MUD in a period of budget surplus.
- Consideration of a monthly Capital Base fee reflecting your resident's desire to pay for improvements with cash in lieu of long term bonds.

Current Rate Structure for Grand Lakes Municipal Utility District No. 2

*As described in the 10 year
Financial Operating Strategy

Car Wash	146,000	\$209.00	\$209.00	\$418.00

CURRENT RATE STRUCTURE OBSERVATIONS

The above is your current rate structure. Historically, your residents have benefitted from greatly reduced service rates, as the District has subsidized, or waived, water, sewer, garbage, security, street lighting, irrigation and mosquito spraying service fees. This was possible due to large amounts of Sales Tax revenue. As this revenue stream has declined, there is an urgent need to restructure the Rate Order to generate enough revenue to cover Operating expenses, pass through service fees to Residents & pay for capital infrastructure projects.

For the purpose of this study, 'Unfunded Expenses' are the annual total of the services described above.

In the recent election, voters did not authorize the bond funding that would have allowed the District to finance these improvements over a 20-30 year period. Because the need for these projects remain, the District must now fund them through operating revenue rather than long-term financing.

Grand Lakes Municipal Utility District No. 2

EVO 10-Year Financial Operating Strategy - FY 2025

What's in SCENARIO 1:

- Maintains a steady M&O tax rate of \$0.128 & assumes a 99% collection rate
- Assumes a 3% annual increase in taxable value
- Assumes a 4.0% average annual increase in garbage expenses and wastewater revenue, based on the 10-year average of historical CPI increases
- Assumes a 3.5% annual increase in other operating expenses
- Includes \$950,922 of new Service revenue from restored Rate Order & \$1,156,000 of regained revenue from Irrigation, Streetlighting & Security.
- Includes \$3.3M of Capital projects funded by remaining bond authorization

With no other adjustments, reserves rise to 8.5 months.

Sources used in this study:

- Revenue and expense data are based on the latest audit
- Beginning cash balance is derived from the latest audit and includes cash, money market, and certificate of deposit funds
- Taxable value & Tax rate are from the latest Tax Report from your Tax Assessor
- All Capital Projects are from your Capital Improvement Plan provided by your Engineer

Ending GOF Cash Balances:

\$5.96M \$235k 3.60M \$3.63M \$3.61M \$3.54M \$3.43M \$3.27M \$3.06M \$2.80M \$2.48M

Months of GOF Reserves:

19.0 months 0.8 months 15.7 months 15.3 months 14.8 months 14.1 months 13.3 months 12.3 months 11.2 months 9.9 months 8.5 months

2025 2026 2027 2028 2029 2030 2031 2032 2033 2034 2035

High Level Observations Scenario 1

Immediate Attention Required

Scenario 1 is the result of the new rate structure introduced with your Restorative Rate Study & revenue gains from releasing the Irrigation, Streetlighting & Security expenses, resulting in \$456k and \$1.2M in revenue respectively beginning in fiscal year 2027. This scenario also assumes the remaining bond authorization will cover \$3.3M in capital projects. The new revenue fully funds Garbage and Recycling and makes up budgetary shortfalls for annual Operations, but still comes short of creating meaningful surplus of revenues over expenses. This scenario does not include any other CIP items beyond 2026, as the first priority is to restore balance to the General fund & establish 12 months of Operating reserves.

Recommendations:

- Implementation of a \$100 monthly Capital Base fee per connection in fiscal year 2027, reflecting your resident's desire to pay for improvements with cash in lieu of long term bonds.
- Second phase of rate increases to be implemented in 2028 to achieve 12 months of reserve coverage

Proposed Rate Structure: Scenario 1

Grand Lakes Municipal Utility District No. 2

Home Depot	95,800	\$394.00	\$333.00	\$727.00
Elementary School	136,000	\$554.00	\$473.00	\$1,027.00
Car Wash	146,000	\$594.00	\$503.00	\$1,097.00

Residential- For the water rates, this structure increases the base rate and includes 5,000 gallons of water. It introduces more tiers, meant to encourage water conservation & mindful usage. For sewer, the base rate is scaled based on total usage. The increased rate is designed to cover Garbage & Recycling annual expense.

Commercial- Historically commercial rates have been heavily subsidized by Sales Tax revenues. This structure corrects the existing imbalance between higher usage versus lower actual charges. These rates are on the lower end in comparison to other modernized Rate Orders in the Houston area. And are significantly lower than what they would pay in the cities of Houston & Fulshear.

Observations: Reclaimed Irrigation & Streetlighting has been returned to HOA & Security contracts have been cancelled. This coupled with the rate increase adds \$2.1M to the General Fund.

Grand Lakes Municipal Utility District No. 2

EVO 10-Year Financial Operating Strategy - FY 2025

What's in SCENARIO 2:

- Maintains a steady M&O tax rate of \$0.128 & assumes a 99% collection rate
- Assumes a 3% annual increase in taxable value
- Assumes a 4.0% average annual increase in garbage expenses and wastewater revenue, based on the 10-year average of historical CPI increases
- Assumes a 3.5% annual increase in other operating expenses
- Includes \$526,962k of new Service revenue from second rate increase in 2028 & \$818,400 of Capital Projects Base Fee revenue.
- Includes remaining \$11M of Capital projects in your Capital Improvement Plan through 2034.

With no other adjustments, reserves fall to 10.8 months.

Sources used in this study:

- Revenue and expense data are based on the latest audit
- Beginning cash balance is derived from the latest audit and includes cash, money market, and certificate of deposit funds
- Taxable value & Tax rate are from the latest Tax Report from your Tax Assessor
- All Capital Projects are from your Capital Improvement Plan provided by your Engineer

Ending GOF Cash Balances:

Months of GOF Reserves:

High Level Observations Scenario 2

Immediate Attention Required

Scenario 2 is the addition of \$818,000 generated by the introduction of a Capital Projects Base Fee of \$100 per connection per month in fiscal year 2027, as well as \$526,962 of service revenue generated from the second rate increase beginning in 2028. This scenario includes the remaining \$11M of projects in your Capital Improvement Plan, but does not account for any unplanned emergency repairs or replacements that may occur in the forecast period. Despite annual surpluses, with no additional revenue streams, the cost of critical capital infrastructure projects quickly reduce Operating reserves beginning in 2028 resulting in the District having less than 12 months of reserves for 8 consecutive years and building back to 10.8 months by 2035.

Recommendations:

- Continue to seek support within the District for a successful Bond Authorization Election
- If Bond Authorization isn't successful, planned annual increases of Capital Base fees passed to your residents will be unavoidable

Proposed Rate Structure: Scenario 2

Home Depot	95,800	\$621.00	\$579.00	\$1,200.00
Elementary School	136,000	\$881.00	\$799.00	\$1,686.00
Car Wash	146,000	\$946.00	\$854.00	\$1,800.00

Residential- For the water rates, this structure maintains the \$30 base rate and includes 2,000 gallons of water. Like option 1, the tiers encourage water conservation & mindful usage. For sewer, the addition tiers are based on usage and that revenue helps support annual Operations & Maintenance and Repairs. The Capital Project Base Fee goes towards funding capital infrastructure projects.

Commercial- Historically commercial rates have been heavily subsidized by Sales Tax revenues. This structure corrects the existing imbalance between higher usage versus lower actual charges. These rates are on the lower end in comparison to other modernized Rate Orders in the Houston area. And are lower than what they would pay in the cities of Houston & Fulshear.

Observations: This option successfully creates annual surplus, however, like option 1, it leaves the District in a precarious Operating position with less than 10 months of Reserves from 2028 thru 2035.
